

EXTEND THE POOL SEASON

BY HEATING THROUGH THE FLOOR

EFFICIENT HEATING SYSTEM FOR POOLS & SPAS

As a pool builder, you strive to deliver the highest quality and most innovative pool experiences to your clients. Our in-floor heating system is the perfect solution to elevate your projects and set yourself apart from the competition.

- Improved circulation from the pool floor has been independently proven to save chemicals heat energy costs
- Increase the perceived value of your pools and attract discerning clients.
- Count on our proven technology for long-lasting, trouble-free operation.

BLUE SQUARE

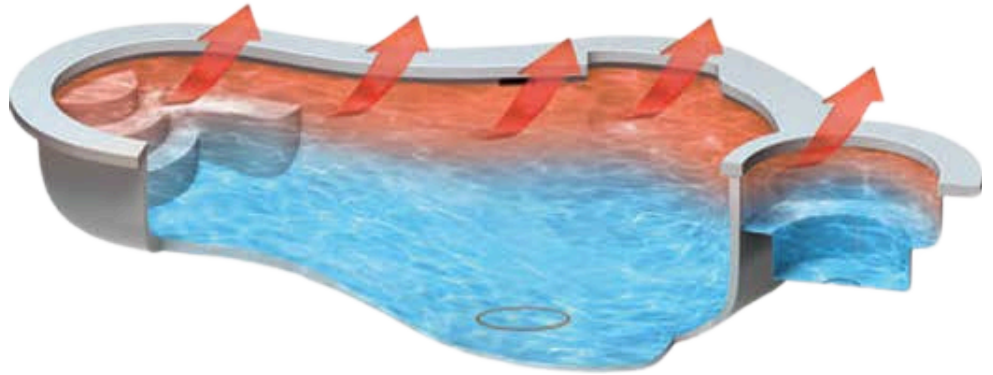

e360™

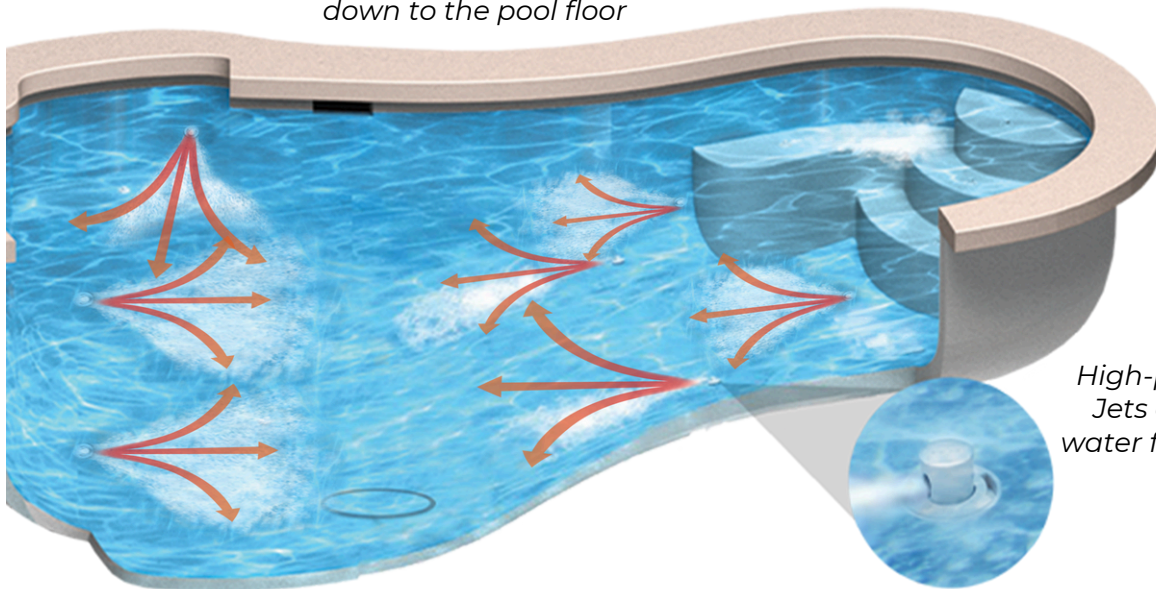

BETTER WATER QUALITY AND TOTAL WATER TURNOVER

Ordinary pools circulate water near the surface, wasting chemicals and energy. The e360 system circulates water at the pool floor, conserving chemicals and heat usually lost into the air above.

Down jets push water down to the pool floor

High-powered In-Floor Jets circulate & heat water from the pool floor
